Technical Skills Overview

Programming & Tools

Linux • Shell Scripting • C • C++

DPDK • FastClick • Perf • LLVM

Git • Gnuplot • \LaTeX

Python • MATLAB • R

TensorFlow • Spark • Pandas

Education

PhD., Information Communication Technology

Specialization: Communication Systems

School of EECS

KTH Royal Institute of Technology

2017 - 2023 | Stockholm, Sweden

MSc., Electrical Engineering

Specialization: Digital Electronic Circuits

Amirkabir University of Technology

2015 - 2017 | Tehran, Iran

BSc., Electrical Engineering

Specialization: Electronics

Sharif University of Technology

2010 - 2015 | Tehran, Iran

Research Summary

I have improved the performance of the Network Functions Virtualization (NFV) service chains running at 100/200-Gbps commodity hardware by using **multi-disciplinary low-level optimization** techniques. I have been actively doing (networked) system programming in C/C++ and running automated experiments on the UNIX environment (e.g., Linux), using bash & Python scripts. My research has resulted in:

- **Google PhD fellowship 2021** award in systems and networking, which recognizes outstanding graduate students doing exceptional and innovative research in areas relevant to computer science.
- Top systems conference papers (**EuroSys'19**, **ATC'20**, **ASPLOS'21**, and **NSDI'22**).
- 19 patent applications filed in collaboration with Ericsson research (see [here](#)).
- News articles at Ericsson Blog (about **memory management**, **packet processing**, and **packet reordering**), KTH news (about **CPU cache** and **traffic order**), **Tech Xplore**, and **Framtidens Forskning**.
- Community award at NSDI'22 for "**Packet Order Matters**".
- Open-source contributions (**CacheDirector**, **DDIO-Bench**, **PacketMill**, **DDC-RA**, and **IOMMU-Bench**).

Watch this [video](#) and read my full [CV](#) & [dissertation](#) for more information.

Experience

Aug 2023 - Present **Senior Researcher in at Connected Intelligence Unit**

RISE

Stockholm, Sweden

AI / Machine Learning and Networking

Aug 2017 - Aug 2023 **Postdoctoral and Doctoral Researcher**

KTH NSlab

Stockholm, Sweden

Advisors: Professor **Dejan Kostić** & Professor **Gerald Q. Maguire Jr.**

- Proposed a slice-aware memory management technique to exploit the non-uniform cache architecture (NUCA) in Intel processors and implemented **CacheDirector** to send packets to the right slice of the Last-Level Cache (LLC).
- Implemented a set of benchmarks (**DDIO-Bench**) to study the effectiveness of Data Direct I/O Technology (DDIO) at 100 Gbps.
- Implemented **PacketMill** to grind the whole packet processing stack and produce a customized binary for a given network function.
- Analyzed a KTH campus trace (via Spark & Pandas) to extract flow-related characteristics & predict packet interarrival time with LSTM (via Keras/TensorFlow) to reorder packets using **Reframer**.
- Implemented a set of benchmarks (**IOMMU-Bench**) to study the impact of IOTLB misses on throughput and extended **Page Pool API** & mlx5 Linux driver to use 2-MiB hugepages for packet buffers to mitigate the IOTLB wall.
- Designed & Implemented a constraint-based C++ framework (**DDC-RA**) to allocate resources in a disaggregated data center.

Tools: DPDK, FastClick, Linux kernel, iPerf, Perf, LLVM, Intel PCM, Intel PMU Profiling Tools, Cache Allocation Technology (CAT), Spark, Pandas, Tensorflow, Gecode.

Hardware: Intel Xeon & AMD EPYC processors, NVIDIA/Mellanox & Intel NICs.

Dec 2015 - Jun 2016 **Portal Specialist**

Mobile Telecommunication Company of Iran (MCCI)

Tehran, Iran

Managed vendors and supervised the development of:

- eCare Application: MyMCI application for **iOS** and **Android**
- eSales Website **eVoucher**
